## **Differential Equations**

Find the particular solution to the following differential equations with the given initial conditions.

1. 
$$\frac{dy}{dx} = \frac{x}{y}$$
;  $y(1) = 3$ 

2. 
$$\frac{dy}{dx} = 2xy; y(0) = -6$$

3. 
$$\frac{dy}{dx} = -2y$$
;  $y(0) = 1$ 

a. What is the value of *x* for which  $y = \frac{1}{2}$ ?
